-Shirts

**272 different T-Shirts provide the right choice for every taste, area of use and budget.
20 new articles offer additional diversity.**

Ring-spun cotton can be distinguished from open-end yarn because of a softer grip and is ideal for printing. Combed cotton is of even higher value.

Polycotton T-shirts are fabricated of cotton and polyester. Certain colours (neon, mottled/melange colours) can only be produced if the fabric contains a certain percentage of polyester. This is not always mentioned in the product description.

Light-coloured polyester T-shirts and polycotton T-shirts with a high percentage of polyester can be printed through sublimation.

A wide range of polyester T-shirts is offered in the categories „Sports & Outdoor“ and „Workwear“.

You will discover special materials like slub yarn, triblend, vintage-look, viscose out of bamboo and many more.

The material weight of T-shirts ranges from 105g/m² to 240g/m².
Lightweight T-shirts (105g/m² to 135g/m²) are especially used for fashionable clothes.
Medium-weight T-Shirts (140g/m² to 1705g/m²) are the standard.
Heavy T-Shirts (starting from 180g/m²) are marked with the „heavy“ symbol.

Polos

130 different polos provide the right choice for every taste, area of use and budget.
8 new articles offer additional diversity.

The classic polo features the socalled piqué bonding of the fabric. Polos marked with the „jersey“ symbol offer a plain surface like T-Shirts and are ideal for printing.

Polos can also be distinguished according to arm cuffs, side vents, design of button placket and the number and type of buttons.

Ring-spun cotton can be distinguished from open-end yarn because of a softer grip and is ideal for printing. Combed cotton has an even higher value and is marked with the „comb“ symbol.

Polycotton polos are fabricated of cotton and polyester. They are dimensionally stable, colour-fast and normally washable up to 60°.
Light-coloured polyester polos and polycotton polos with a high percentage of polyester can be printed through sublimation.
Many polyester polos are offered in the categories „Sports & Outdoor“ and „Workwear“.

The material weight of polos ranges from 170g/m² to 270g/m². Heavy polos (starting from 200g/m²) are marked with the „heavy“ symbol.

155 different sweats provide the right choice for every taste, area of use and budget.
5 new articles offer additional diversity.

Ring-spun cotton can be distinguished from open-end yarn because of a softer grip and is ideal for printing. Combed cotton has an even higher value and is marked with the „comb“ symbol.

Many sweaters contain more than 20% polyester to offer a better dimensional stability. The composition of the fabric differs a lot between the manufacturers. Some of the sweaters are washable up to 60°.

Functional sweaters offering special characteristics can be found in the categories „Sports & Outdoor“ and „Workwear“.

Most of our sweatshirts are roughened inside. Alternatively, there is the „French Terry“ quality.

The material weight of polos ranges from 240g/m² to 380g/m². Heavy sweaters (starting from 300g/m²) are marked with the „heavy“ symbol.

& Outdoor

191 different articles provide the right choice for every taste, area of use and budget.
21 new articles offer additional diversity.

Polyester is the fabric for sports clothes. All polyester fibres are especially resistant to light, weather and mechanic abrasion. They are lightweight, dimensionally stable, easy-care, fast drying and can absorb moisture from the body if they have a certain construction.

Fabrics made of micropolyester offer a fine, soft grip and are windproof and often also strongly water-repellent.

Moreover there are many function polyester yarns: brands like Coolmax® and many more offer yarns/fibres that are optimised in their microstructure and therefore provide an additional functional value.

Further benefits (like antibacterial, water-repellent or cooling functions) arise from equipment and lining.

All light-coloured textiles fabricated of polyester can be also printed through sublimation.

Fleece

93 different fleece articles provide the right choice for every taste, area of use and budget. 19 new articles offer additional diversity.

Fleece is a roughened velours made of polyester.
This material is dimensionally very stable, offers a high heat insulation at low weight, is water-repellent and feels pleasant next to the skin.

Most suppliers offer knitted fleece jackets that differ from classic fleece jackets visually and have a smooth knitted surface. The soft fleece inside enables in combination with the knitted material a good heat insulation.

Another alternative in the fleece division are stretch fleece styles wich contain elastane.

Some fleece jackets have a smooth outside (roughened inside) for ideal decoration.

Membranes are used to make a fleece jacket windproof. These items are marked with the „membrane" symbol in our catalogue.

Antipilling equipment is used to reduce the kinking and felting effect.

The material weight of fleece articles ranges from 170g/m² to 400g/m². Heavy sweaters (starting from 300g/m²) are marked with the „heavy" symbol.

ts & Vests

237 different jackets and vests provide the right choice for every taste, area of use and budget.
39 new articles offer additional diversity.

We distinguish between light (wind/rain-) jackets, between-seasons jackets and real winter jackets. Winter jackets are marked with a „snowflake“ symbol.

3–in–1 and 4–in–1 jackets are jackets with a detachable inner jacket.
Another variation in this division are jackets with detachable arms.

Softshell jackets consist of 2 or 3 layers. 2-layer softshell jackets don't have a membrane. They are nor water- neither windproof, but therefore very breathable.

Many jackets are water-repellent.
Some of our jackets are waterproof. Jackets marked with the „waterproof“ symbol have a certain water column and at least the exposed seams are sealed.

Down jackets offer a good heat insulation with low weight.

DuPontTM Sorona®is a special fiber that is to one third made from renewable resources with a lower power requirement in production. This fiber offers in addition a good heat insulation.

Threre are jackets that feature a zip in lining for decoration.

Functional jackets with special characteristics can also be found in the catagories „Sports & Outdoor“ and „Workwear“.

Business & Trousers

176 different shirts, blouses, pullover, cardigans and trousers provide the right choice for every taste, area of use and budget. 15 new articles offer additional diversity.

Shirts and blouses can be distinguished according to material, collar, waist, cuffs, butten placket and sleeves.

Poplin cotton and poplin mix offer a light, smooth material. Oxford is very durable. Twill stands out due to diagonal yarn.

Moreover, there are products made of denim, stretch, herringbone and moss crepe on the following pages.

Most shirts feature a classsic Kent or Button-Down collar.

Function shirts can be found on page 125 in the category „Sports & Outdoor" (trekking).

This division includes pullovers and cardigans made of pure cotton or blended fabric containing merino wool, acryl, cotton, cashmir and silk.

The brands Kariban and SOL'S offer cotton trousers that are included in this category.

Workwear Trousers may be found in the category „Workwear" starting from page 242.

Pages 246/247

rkwear

103 different workwear articles provide the right choice for every taste, area of use and budget. 18 new articles offer additional diversity.

This division includes clothes for working inside and outside, in summer and winter, as well as in different sectors. Waterpro- of articles with sealed seams and winter jackets are marked accordingly. Threre are jackets that feature a zip in lining for decoration.

James & Nicholson offers a complete workwear collection in 8 colours. This basic assortment is complemented by further workwear products that are available in a large number of colours. This collection focuses on durability.

,

This category includes lots of aprons for different areas of use. Premier offers a great variety of shirts/blouses (p. 226) and aprons/accessories (S. 253/254) in matching colours.

A great variety of safety articles including vests, (softshell) jackets, bags and head- wear are presented on the pages 258-259.

Many workwear articles are washable up to 60°, some even up to 95°.

& Hats

114 articles provide the right choice for every taste, area of use and budget.
65 new articles offer additional diversity.

The articles are divided into summer and winter products.

Caps can be distinguished according to number of panels, material, shield and closure.

Many of our caps have a central seam (6 panels) and are therefore only conditionally printable.

The most popular materials for caps are cotton and polyester. Most of our winter products are made of polyacryl, some of fleece or cotton.

Atlantis and Myrtle Beach offer caps with flat visor.

The offer in this category is completed by gloves, scarfs and bandanas.

Caps for special use such as sport, workwear and safety can be found in the corresponding categories.

If you want to combine caps with other textiles the combination of James & Nicholson and Myrtle Beach can be recommended, as some of the colours are complementary.

Bags & cessories

114 different articles provide the right choice for every taste, area of use and budget.
65 new articles offer additional diversity.

Halfar, Kimood, SOL'S and Westford Mill bags offer a huge selection, that includes cotton bags in different colours, sizes and versions as well as bags for school, university, work, congress, smartphone, tablet, shopping, travelling, beach, sports, trekking and much more.

This impressive collection contains everything from neccessaires to waterproof drybags.

The variety of materials includes – besides (organic) cotton and polyester – among others truck plane, artificial leather, nylon and felt.

Westford Mill offers as well Fair Trade articles.

10 new Fare umbrellas complement the exisiting Kimood collection. This collection includes mini, as well as automatic and golf umbrellas in lots of finishes and colours. The new Fare umbrellas impress by quality and nice details, like coloured details or colour changing effect in the rain.

9 blankets provide a wide range of colours and patterns.

Please note:
Each brand has a different definition of size run. Even within a collection, different products may have different sizes and cuts. For this reason, we recommend you to decide your size ratio by means of samples.
